OpenAI Codex - Proof of Use

SDC Hackathon 2026 | Fool's Horizon | FuturePath Intelligence

Declared purpose

OpenAI Codex was used in development workflows including implementation, code review, engineering documents, architecture and testing assistance. ChatGPT was also disclosed as a project planning and documentation tool.

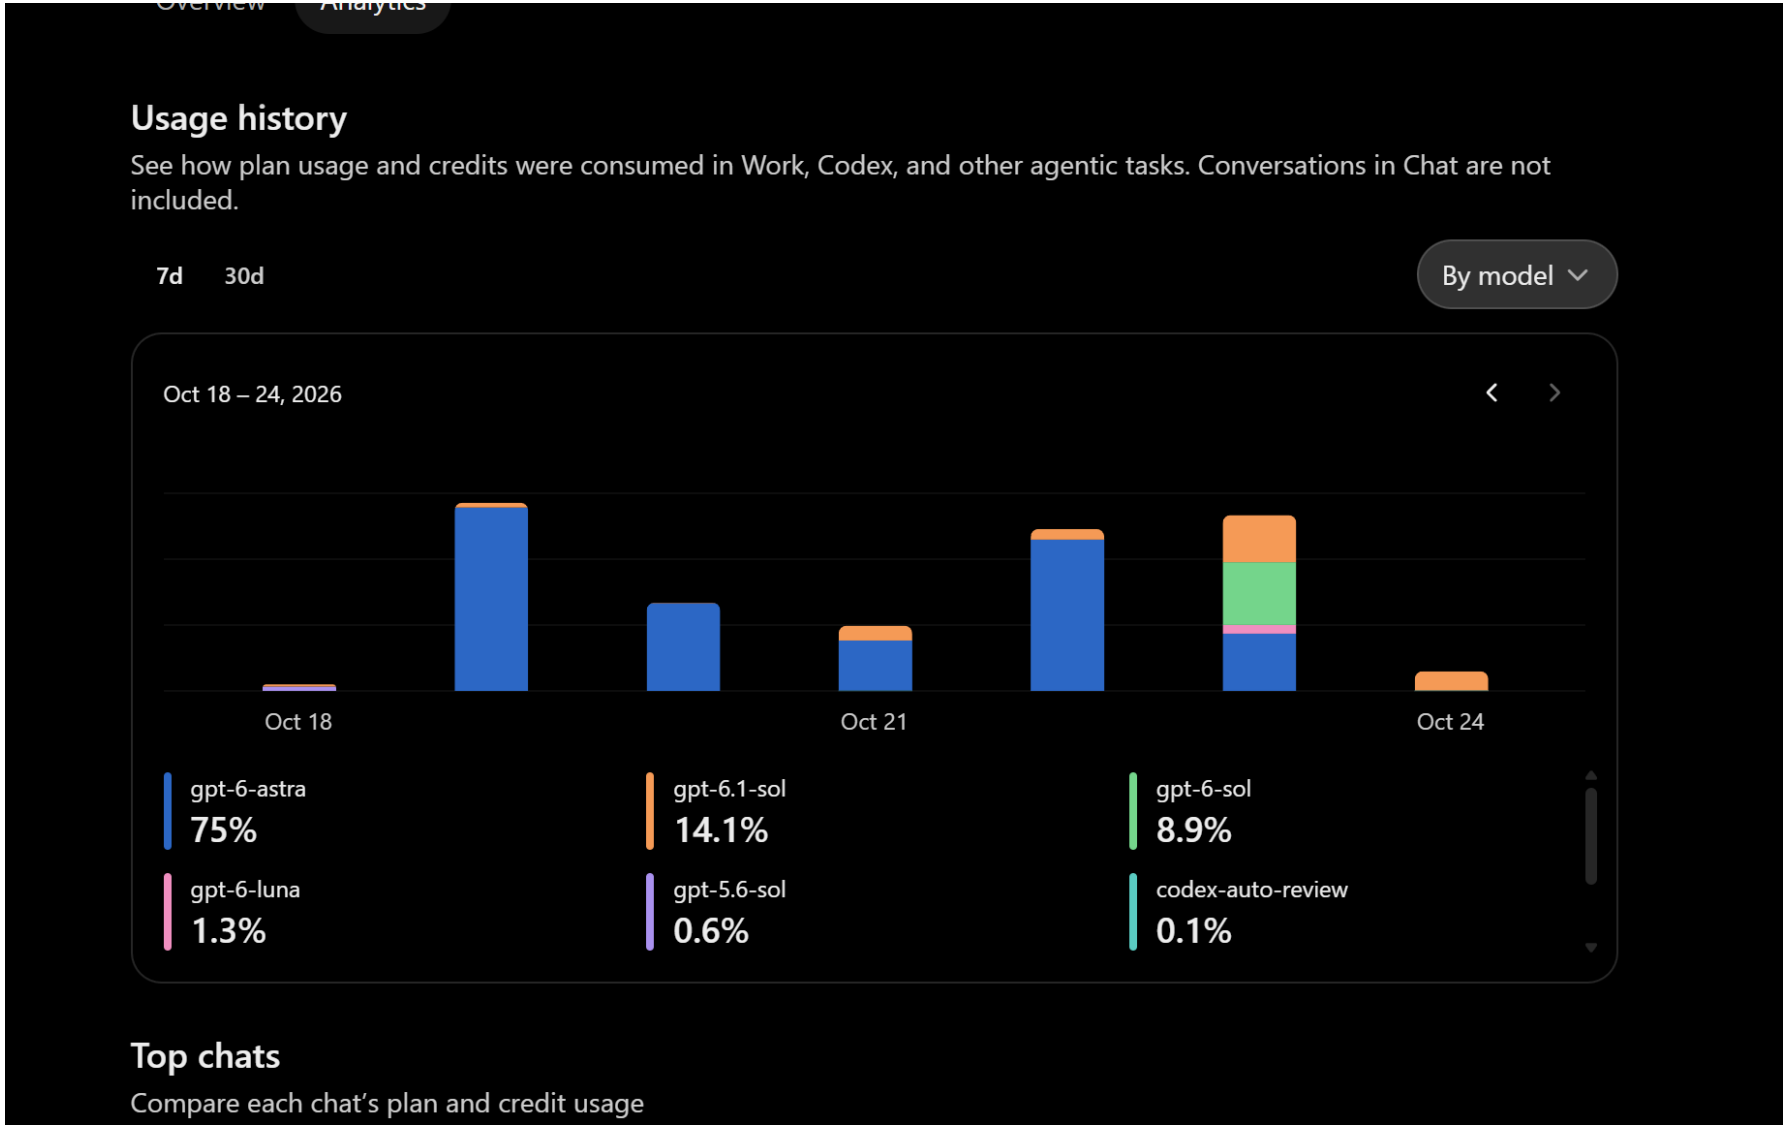

Scope and evidence limitations

Screenshots: OpenAI agentic usage history, broken down by model, feature and surface.
Visible usage window: 18-24 October 2026; model labels as shown in screenshots.
Codex usage is visible across Work, CLI and Desktop app surfaces.
Important: the page explicitly states normal Chat conversations are NOT included.
Therefore these charts prove Codex/agentic usage, NOT individual ChatGPT chat usage.
Account-wide usage charts alone do not establish project-specific token totals.
